

# DOCA Scott Air Force Base

## Conference Notes

August 15-16, 2022

By DOCA Member Robert Jans ('12)

Below is a short update regarding DOCA and the recent conference held at Scott AFB, August 15-16, 2022.

### SCOTT AIR FORCE BASE

St. Louis/Scott AFB was a resounding success! This past week, sixteen DOCA members were able to attend and were given a clear picture of what Air Mobility Command (AMC) provides for our Joint Forces Worldwide Global Mobility. From the very top, General Minihan, AMC/CC, expressed the commitment made by both himself and his entire command to ensure excellence and top performance in all that they do. Having provided the transportation of 238K people from Afghanistan and now arranging the supply of military armaments to Ukraine, his four-star command is already making the necessary plans to support our military in the Western Pacific. Because they are responsible for all the land, sea, and air deployment of troops and equipment worldwide which they operate 24/7, plus all of the air and sea refueling operations and medical airlifts, they deploy missions every 4 minutes. Finally, General Minihan and all of his commanders emphasized their need for civic leaders (such as DOCA members) to spread the word.

In addition, here is a video we think you'll enjoy.
